

RC01 ELECTRIC VEHICLE BATTERY AIR LEAK TESTER

Specially designed for post-sales service of electric vehicles, primarily used for air leak testing of automotive components such as battery water-cooling pipes and battery packs, preventing accidents caused by battery pack leakage, and providing strong protection for the safe travel of electric vehicles.

(mm)

Android 4.4.2

10.1 inch touch screen

Automatic pressure regulation

Pre-inflation function

Efficiency

Personalized customization

Operating temperature : 0~50°C

Operating humidity: ≤95%RH(No condensation)

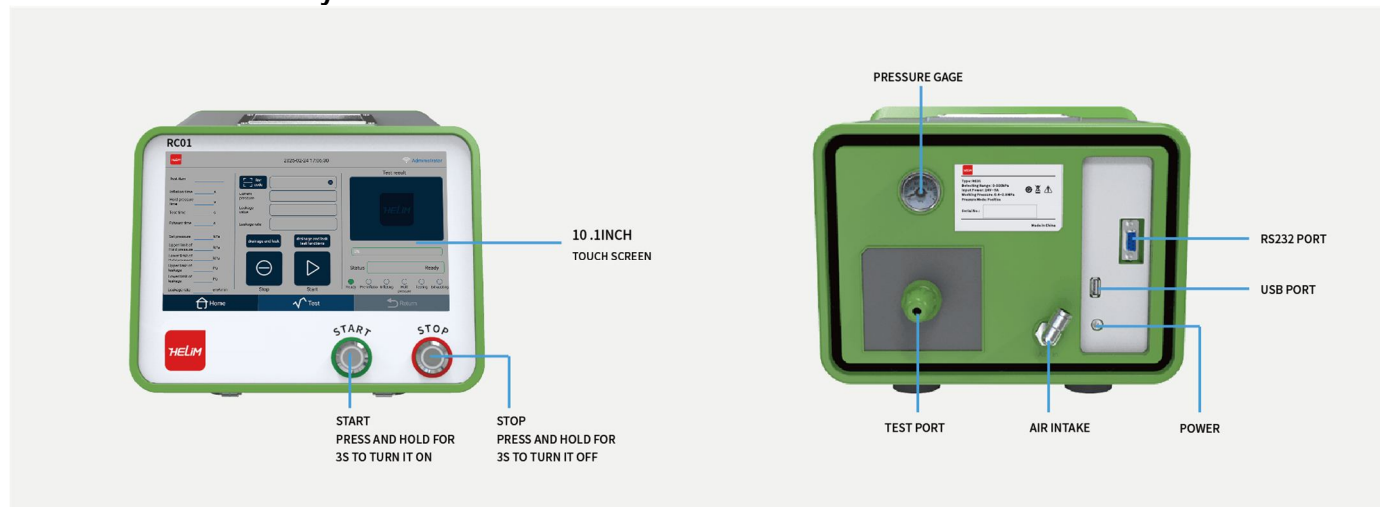

Air supply: 0.4~0.8MPa(Clean and dry)

Net weight: 9.2±0.1KG

Power Supply: AC110~200V、50HZ

Dimension: 280x374x232mm

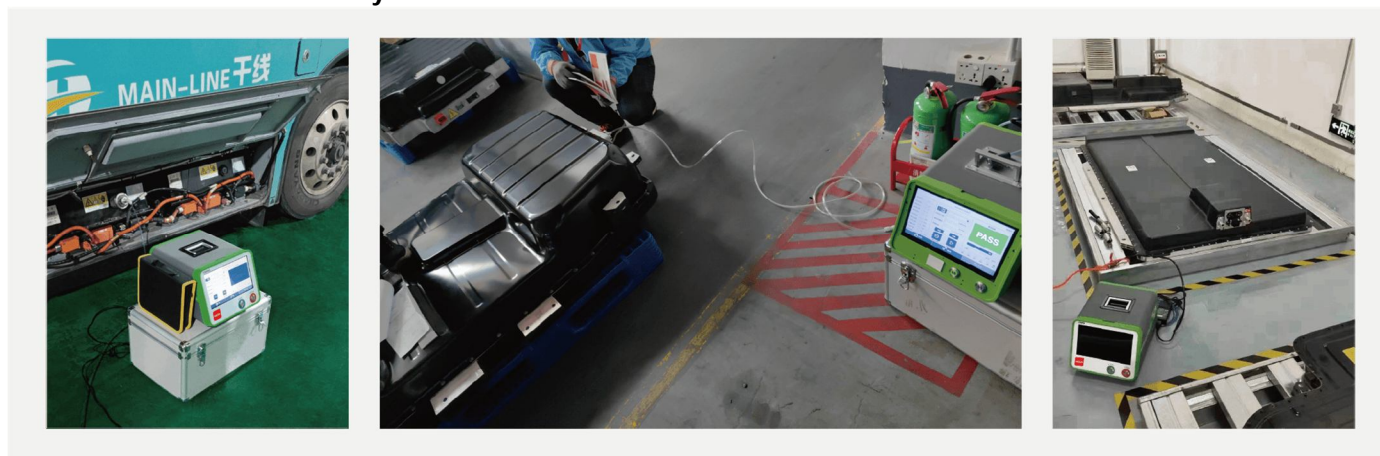

Port introduction of battery air leak tester

Technical parameter

Modell	RC01
System	Android 4.4.2
Core module	CPU : 1.4GHz / RAM : 1GB
Data storage	16GB
Display screen	10.1-inch multi-point color touch screen
Language	Chinese, English,
Number of programs	1000 groups
Number of test ports	1
Low pressure range	0-10kPa
High pressure range	10~500kPa
Measurement resolution	0.1Pa
Pressure repetition accuracy	0.1%FS
Pressure repeatability accuracy	$\pm 0.02\%FS\%FS \sim 0.05\%FS$
Pressure regulation mode	Automatic pressure regulation

Cases for electric vehicle battery air leak solution
